Is Indian Ethnic Clothing fading out?

Western clothing has had an impact on India and Indian women in recent years. Range, price and ease-of-use are primary factors for women to switch to a jeans, t-shirt or a western blouse. Is Indian ethnic clothing fading out then?

Let us see. Millions of **new designs**, splash of **creative colors**, bold prints, tons of **craft work** – beads, sequins, stones, crystals... there appears to be no end for Sarees, Salwars and Kurtis.

Avenues of garment stores make a **roaring business** in every Indian city. Buying a **silk saree** with a bandwagon of eager relatives is a common occurrence even now in **South India**. Adorning the craftiest **lehenga choli** is every bride's dream in the **North**. **Online stores** have helped the spread of this ethnic clothing to people.

Indian ethnic clothing is here to stay... it can never go out of fashion!
